

CMS/Morrell - Solar Panel System

System was installed September 2011

By [Royal Solar of Arizona](#)

- System Size: 49.92 kW-DC
- Number of solar panels: 208
- Projected annual electricity production: 93,300 kWh
- Percentage of building's electricity usage offset: 70%
- Estimated annual electricity savings: \$15,000
- System is expected to offset 4,465,389 Lbs of Carbon during its lifetime, which is equivalent to planting 46,113 trees or savings 229,262 gallons of gas

Real-time online monitoring of our solar panel system can be seen at:
